**Figures.**

GRAIN and PRODUCE STORE in building on the corner of Plaza and North Vicksburg Street, Reno. The prices by fair dealing and reasonable rates to deserve a share of the public patronage. Give me a trial.

ON TO WASHINGTON.

Senator Sharon will come down from Virginia City to Reno to-night, and continue on to Washington, to take the usual oath of office, and perform the duties of a Senator of the nation. His stay will not be long this time—only four weeks—business of importance demanding his attention on this Coast. We have found no fault with Mr. Sharon for his delay in going on to Washington. We, for one, are willing to accept the excuse he offers, for non-attendance at the National Capital. The work he has been engaged in for the past few months has been of more benefit to his constituents than probably his whole career in Congress will be. Other men would have never undertaken the task Sharon assumed, and which he has so successfully carried through. By so doing he nearly placed himself under the thumbs of his financial enemies; has, without doubt, been crippled, but not to any serious extent. The motives which prompted such action reflect credit on the man, and he is deserving of great praise. Only a fool would censure him. In this matter, whatever likes and dislikes Sharon or ourselves may entertain for each other, we heartily accord to him all the honor to which he is entitled. And we sincerely hope that his public acts will harmonize with some of his private ones. If his Senatorial career shall be marked by such a course, we shall regret ever having opposed his election.

GRANT AND BABCOCK.

A Washington telegram of the 12th gives the gist of Grant's deposition in the case of Babcock, and it is said to be strongly in favor of Babcock's honesty. The deposition developed the facts that Babcock has not influenced or attempted to influence the Executive in the selection of any official involved in the so-called whisky ring; that he had not interfered in any manner to cause a suspension of the celebrated order for the transfer of supervisors, but that its revocation was directed by the President himself in order that—suspicion being removed from the minds of those engaged in the frauds—they might more readily be detected in their efforts to cheat the government out of the revenue on distilled spirits; that the President has implicit confidence in the integrity of Babcock, and is satisfied with his explanation of the dispatches which have formed so important an element in his prosecution. He said that during the twelve years Babcock had been intimately associated with him he had not learned anything calculated to impair his confidence in his integrity.

**TAXATION OF RAILROAD LANDS.**—The House bill for the taxation of railroad lands provides that if a company refuses to pay the cost of surveying they may be paid by any purchaser at tax sale, and constitute a lien on the patent which shall thereupon be issued to the company. The House Committee on Public Lands have substantially agreed to report a bill, making lands granted to the Pacific Railroad Companies liable to local taxation as soon as earned by said companies, but it is not likely to seek that aim through compelling Railroads to receive patents on pain of forfeiture.

JUDGE WHEELER, of San Francisco, has decided that the Act of Legislature, establishing the Industrial School is unconstitutional, holding that the Police Judge has no power to send boys to that institution for misdemeanor, unless they have been convicted by a jury. This decision virtually releases all the present inmates.

NEVADA'S CENTENNIAL.

The Carson *Appeal* renews its suggestion that Carson be accepted as the trying place for the Centennial celebration in Nevada, and recommends that the materials of all lesser local celebrations should be reserved to form parts of one grand whole; and to that end, the military and civic societies, the various orders, fraternities, etc., of neighboring citizens and towns should forego local parades, and unite together to make a grand demonstration at the State Capital. We second the proposition, thus throwing aside all feelings of selfishness, and petty rivalry, for Reno has no desire to coral or grab for all the good things occasionally furnished by the State. The proposition is an admirable one. Many of us will be at Philadelphia to see the colossal and magnificent Centennial Exposition, for the civilized countries of the earth will send thither their rarest and costliest treasures, and the beautiful will vie with the useful. India and the rest of the Orient will endeavor to outstrip the Occident in the splendor of the articles which they will submit to the admiring gaze of millions. Earth will yield up her gems, the Caspian her pearls, and the seas their wonders, for the grand occasion. The enning of the loom and the workshop, the costly silks woven from the product of the cocoon, the beauties of the garden, the luscious fruits of the orchard, the grain of the field, and the wrought fabrics of the golden fleece, will be poured into the exhibitional lap. Specimens of all organic life—everything that creeps, or walks, or flies, or swims; of inorganic life—the ores and other treasures of the mine and the forest and the seashore—will be found in one grand collection. The arts of sculpture and painting will add their wonders to the store, and the antiquarian will rummage the depositories of the curious things of ancient, medieval and modern times in order to give *selat* to the celebration. Tens of thousands of objects will pass before the retina of the eye and be forever photographed on the mind, and pleasing memories of a visit to the exposition will long outlive the inspection. But it will be impossible for all to leave their homes, and their farms, and their accustomed daily avocation. While many shall be absent enjoying floating pleasures, let those at home not die of ennui. Rather let their State pride come to the rescue, and joining together, let them celebrate, even though it be on a smaller scale, the glorious 4th of this anniversary of our nation's birthday. And we join with the *Appeal* in recommending Carson as the most appropriate place.

When the Centennial bill was before Congress Senator Jones read a Constitutional argument in favor of the bill and made an earnest appeal on patriotic grounds for a united effort to make the celebration a successful and grand affair, and a sincere effort to restore the old harmony and brotherhood of union.

The silver coins of the United States shall be a trade dollar, a half-dollar or fifty-cent piece, a quarter-dollar or twenty-five-cent piece, a dime or ten cent piece. \* \* \* The Silver coins of the United States shall be a legal tender at their nominal value for any amount not exceeding five dollars in any one payment. U. S. Law.

The coinage of the three United States Mints for January was as follows: Gold—San Francisco, \$1,940,000; Silver, \$617,000; Total, \$2,557,000. Gold—Carson, \$160,280; Silver, \$325,000; Total, \$485,280. Gold—Philadelphia, \$2,068,800; Silver, \$300,410; Total, \$2,369,210.

The dividends declared by mining companies during the present month are as follows:

Name.	Per share.	Am't.
Consolidated Virginia.....	\$10 00	\$1,000,000
Northern Belle.....	50 00	50,000
Baldwin.....	1 00	100,000
Alps.....	25	7,500
Loupard.....	75	37,500
Total.....		\$1,275,000

**POOR-SELLING** on the great four-mile running race will begin next Friday evening at the Lick House. Turf men are watching the weather with much anxiety. The late rains have made the track very heavy, but there will be no trouble about putting it in order in a few clear days.

NEVADA STATE NEWS.

The ballion shipments from Piocho for the past month aggregate \$195,200.

Winnemucca has just completed one of the finest public halls in the State of Nevada.

The January product of the Balchior was \$225,500. A handsome surplus was carried over from the last dividend.

Enreka is suffering from the inroads of burglars, hardly a night passing without one or more houses being entered and robbed.

Great excitement prevails in the Jersey Mining District, in the southern part of Humboldt county. It bids fair for an excellent camp.

A shipment of \$17,600 is at hand from the Raymond & Ely mine. The ore now being taken from a portion of this mine assays \$140, against \$75 per ton a short time ago.

The shaft at the Julia Consolidated mine is being sunk at the rate of three feet daily. The ledge on the 1600-foot level is of a promising character. The price of the stock has not varied much during the past week or two.

During a difficulty between William Paterson and John Kelly at Bullionville the other day, Paterson stabbed Kelly in the head and abdomen. The latter wound is quite serious. Kelly was taken to Piocho for medical treatment and now lies in the county hospital. It is thought he will recover.

The dividends paid by the Consolidated Virginia Mining Company to date aggregate the sum of \$15,120,000. As the dividends represent 50 per cent. of the yield, it follows that the product of the mine for the past twenty-two months has been upwards of \$30,000,000. The monthly yield now is close upon \$2,000,000, and unless some adverse circumstances should occur, will be maintained at that figure throughout the remainder of the year.

**CENTENNIAL NOTES.**—The Carson *Appeal* furnishes us the main facts relative to Mr. Stevenson's visit to Philadelphia with regard to Nevada affairs. The Smithsonian Institute managers agree to place our mineralogical collection in their building, arrange and label the same, and make assays of ores at their own expense. It is also a part of their plan that the Donaldson collection shall form a part of the Nevada exhibit of minerals. The Institute will do all this provided we deliver our collection on the exhibition grounds at our own expense, and further provided that we appropriate two thousand dollars for showcases wherein to display these minerals. This makes a very great reduction in the original estimates. These included an outlay \$2,500 for arranging and labeling the specimens and \$2,500 for cases. The saving here, then, is \$3,000. The Smithsonian Institute has a building of its own on the Fair grounds. The cabinet at the conclusion of the exhibition will become the property of the Institute—much the best and most conspicuous repository in the United States. About the quartz mill, this is the present arrangement: The mill will cost \$5,700. A building in which to erect and exhibit it is proposed. Space for the erection of this building, 36 feet distant from Machinery Hall has been allotted to us. The dimensions of the contemplated building are 40x60 feet. The cost of erecting it will be \$2,650. It will have a minimum height inside of 16 feet. It will be wainscoted four feet up, and above that, glass. It will be built opposite an aisle of the Machinery Hall and, only 36 feet distant from it. A railway track runs right in front of where the door will be. By these arrangements of cabinet and mill there will be a difference of \$1,000 in favor of the appropriation as against the estimate last published. It will be remembered that at the last meeting of the Board a sum of money—\$1,000—was voted toward a Nevada Headquarters building. Mr. Stevenson says our lot has been set apart on what is known as State Avenue, and that we are made next door neighbor to Delaware on one side and Minnesota on the other. Of course all these plans remain as simple suggestions until such time as the Board meets and adopts them as its own. They seem feasible and well calculated to secure what we want done.

Wardon Hyman Speaks His Mind.

In the course of the direct examination of Col. Hyman before the Board of Prison Commissioners, he spoke his mind freely with regard to his accusers as follows: I have never had any arrangement with any persons dealing with the Prison by which I have gained any profit, or in the sale of any manufactured goods; I never made any agreement nor had any collusion with any person in or about or out of the Prison whereby the truth was suppressed or concealed or exaggerated, whereby the State was injured in any manner; never entered into any collusion whereby the State could be defrauded of one dollar; any man or men so stating or so intimating utters a willful and a malicious lie, and I challenge the proof, knowing that no man of respectability, whoever he may be, would make an oath to that effect; that I may be fully understood and my remarks properly construed, I will say that I allude especially to Gov. Bradley's card in the *Enterprise*. I allude to that card thus far and further I believe through lies and misrepresentations from bad men who had no object in view to benefit the State, but to gratify personal spleen, and to advance their personal interest so persistently lied and misrepresented to Gov. Bradley, that they raised a doubt in his mind as to my honesty; they furthermore through their influences obtained the aid of the Governor, thoughtlessly I think, to connive with convicts to learn whether such was the case or not. If Governor Bradley is the man I once supposed him to be, when it is clearly proven as it will be, then he will frankly acknowledge that he was in error; if he does not, then my remarks will refer to him as well as to others."

**RULES FOR CURRENT CALCULATIONS.**—Gold being quoted at a certain per cent., to find the relative value of currency. Rule.—Divide 10,000 by the gold quotation.

When currency is selling at a certain per cent., to find the relative value of gold. Rule.—Divide 10,000 by selling price of currency.

The selling price of currency being given, to find the currency equivalent of a certain sum in gold. Rule.—Divide the amount of gold with two ciphers annexed for cents, by the value of one dollar in currency.

Gold being quoted at a certain per cent., to find the gold equivalent of a certain sum of currency. Rule.—Divide the sum of currency, with two ciphers annexed for cents, by the quotation for gold.

Gold coins contain nine parts of gold and one part of an alloy of silver and copper. Silver coins contain nine parts silver and one part copper, excepting the three-cent piece, which is three parts silver and one part copper.

A million dollars in gold, according to figures at the Mint, weigh just about two tons.

**JAPANESE AGRICULTURAL COLLEGE.**—The Japanese are progressive people. Only a few years since the Government engaged General Capron, late Commissioner of Agriculture at Washington, to go to Japan and teach the Japanese practical agriculture in the field. Capron is still in the Government employ, and has imported from this country some of the finest horned cattle and sheep to be found on the Atlantic and Pacific slopes. The Japanese Government has now determined to found an agricultural College, and has sent over a special Commissioner to this country to make arrangements to that effect. The Commissioner has settled upon the Amherst Agricultural College, of Massachusetts, as a model, and has obtained the consent of the Trustees of that institution for the temporary absence of Professor W. S. Clarke for one year, to go over to Japan and found the proposed Japanese college. Ample capital will be furnished, and Professor Clarke will select his own assistants. Thus the United States are furnishing the Japanese practical farmers and teachers of agriculture.

The lack of political honesty, says the *Elko Post*, has long been proverbial among us. But it is a new thing that the Federal officials of a whole vast district should be charged with defrauding the Government. The so-called "Whisky Ring" trials in the West is one of the worst stains on our form of government. Men of high name and character are convicted of gross crimes and the names of high men in office are bedraggled in the mire. Certainly the disease is bad and needs treatment. But it is a matter for individual effort, and every honest man and woman can lend a hand by denouncing dishonesty wherever found.

**HIS CONDITION.**—Dan. Hallahan, who was so badly injured while running a circular saw for the Enreka and Palisade Railroad, near Alpha, a short time ago, and was brought to the Elko County Hospital for treatment, is as we learn from his brother, gradually improving under the skillful care of the Hospital Physician, Dr. Meigs. It will be remembered that his arm had to be amputated below the elbow, after mortification had set in. His brother informs us that another piece of it will have to be taken off as soon as the surgeon deems it advisable to perform the operation.—*Elko Post*.
